

FILOMATICA MAROS

SMALL METAL PARTS TURNED FROM BRASS WIRE

*Quantity
of Quality*

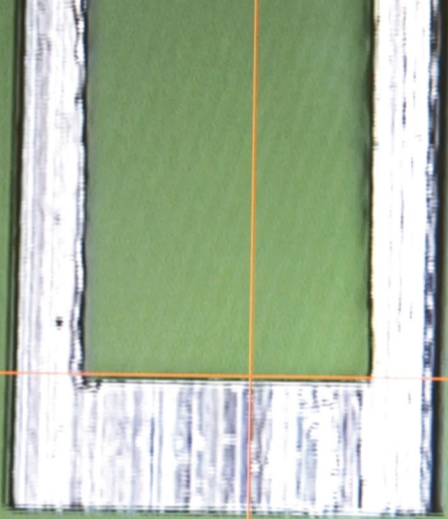

M & S

Continuous studies and research in technological innovations, together with investments to automate and speed up all production processes, specialise FILOMATICA MAROS in large series production, guaranteeing an ever increasing production capacity. The quality control room, which has required considerable investments, lies within our company.

Its modern equipment, such as C.N. contour projectors, microscopes, durometers, comparing elements, gauges, micrometers and specific testing equipment, are used daily in order to comply with the tolerances set and, should it be necessary, to reset optimum conditions, thus avoiding any non conformity of production. A further step forward will be the awarding of the certification in compliance with ISO 9002.

large series production

The whole production
is based exclusively on specifications
set by our customer.

LIGHTING TECHNOLOGY

BULB HOLDER CLAMPS

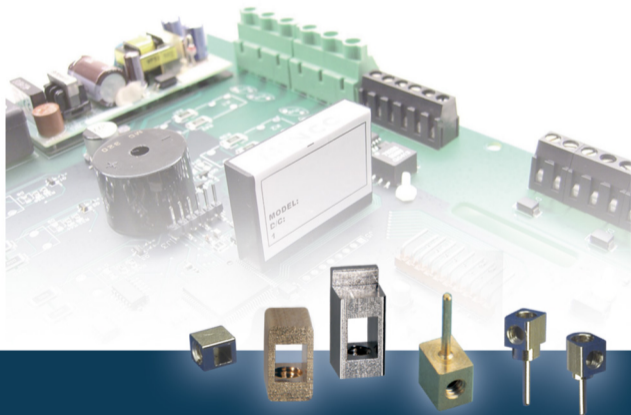

Lighting engineering electrical
components
for lighting systems

ELECTRONICS

ELECTRONIC CONNECTION CLAMPS

Connectors for terminal blocks
for printed circuit clamps

ELECTROMECHANICS

ELECTROMECHANIC CONNECTION CLAMPS

Clamps for Terminal block clamps with wire holder.
Terminal clamps connectors for industrial and home
installations. Clamps for switches.

PLUGS AND BUSHES

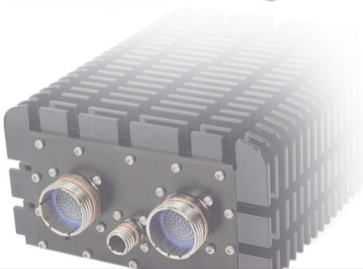

INDUSTRIAL AND HOME AREAS

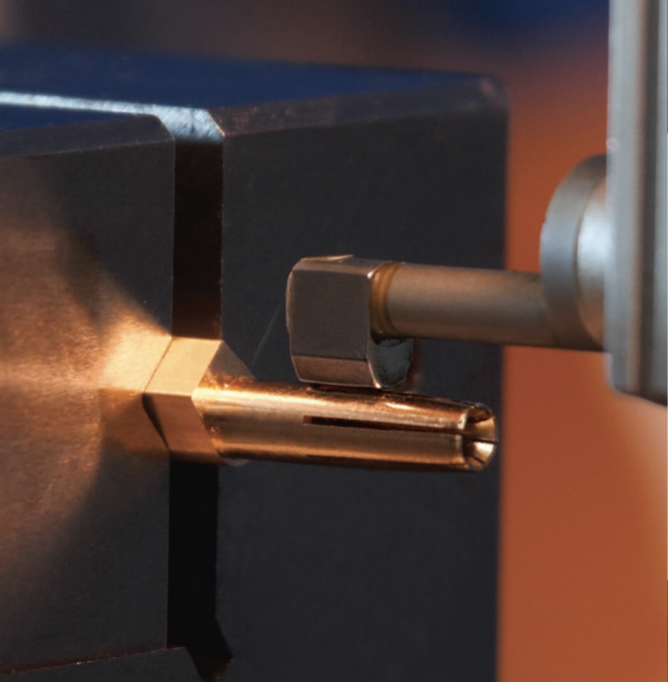

Wide range of components
for plugs and connectors
(industrial and home areas)

POGO PINS INDUSTRIAL AREAS

Multipin industrial
connectors
(military switches)
